>Ramsey, Christopher Bronk, 2009. Bayesian Analysis of Radiocarbon Dates, *RADIOCARBON*, Vol 51, Nr 1, 2009, p 337–360. TBF Note: Ramsey is good clarification that (i). ¹⁴C dates are not dates at all but measurements of an isotope ratio. Interpretation of ¹⁴C measurements requires statistical analysis using a calibration curve. Once calibrated, ¹⁴C dates have probability density functions that are not normally distributed and, therefore, many of the standard methods of classical statistics cannot be applied.

>Rasmussen M, Anzick SL, Waters MR, Skoglund P, DeGiorgio M, Stafford TW Jr, Rasmussen S, Moltke I, Albrechtsen A, Doyle SM, et al. 2014. The genome of a late Pleistocene human from a Clovis burial site in western Montana. *Nature* 506(7487):225–229.

Reich DE. 2018. *Who We Are and How We Got Here*. New York: Pantheon. [TBF Note: A wonderful general read on the status of DNA genetics research relative to Early human dispersal throughout the world. Takeaways – (i) there are no pure strands of ancestry, the biologic drive is for diversification; (ii) the technology is advancing a lightspeed rate – this book reflects status as of 2016/17; (iii) touches on the southeast Asian ghost population evidenced in Amazonian Indian genetics.]
